

Trash and Recycle Collection is normally on **Thursday mornings**. To keep our streets uncluttered for as long as possible, please do not place trash and recycle containers at the curb before 4 pm on Wednesday.

To make it possible for the recycling truck's automated system to pick up your recycling container, (1) please place the container with its handle and wheels facing your house (there is an arrow on the lid to remind you), and (2) please leave at least three feet between the recycling container and any other containers and material that you put out for regular trash collection.

Lee County requires that both the trash and recycling cans have lids. This rule is designed to prevent overnight rummaging by animals. For the same reason, if you have plastic trash bags that will not fit into your container, please do not put them on the curb until the morning of pickup.

Horticulture Waste Pickup: Collection is normally on Thursday morning. As with trash and recycling containers, landscaping cuttings and other plant materials should not be put at the curb before 4 pm on the day before pickup.
